

There Blooms a Garden

Container Recipe

'Limón Sherbet'

The chartreuse foliage of *Talinum paniculatum* 'Limón' are a perfect foil for burgundy spikes and cherry-coloured blossoms. A cheerful container for deck or patio.

Suitable for full sun exposure

Container size: 24-28" diameter

Required plants:

1 *Cordyline australis* 'Red Star'*

3 *Calibrachoa* 'Double Strawberry'

3-5 *Talinum paniculatum* 'Limón'(depending on plant start size)

** Cordyline is a tender perennial that can be over-wintered indoors. Repot in fresh potting soil at the end of the growing season. Place indoors in maximum light, i.e. southern window. Allow the plant to dry down between watering without drying out completely. Gently replot in large container in the spring when temperatures allow a safe transition outdoors.*
